

FCCWashington, D.C.

To whom this may concern,

I'm write to submit a public comment regarding the National Association of Broadcasters (NAB) petition to dictate the content of XM Radio and other satellite radio providers. As a subscriber to XM radio, I appreciate the presence of a radio service that delivers content unavailable and not permitted on regulated radio bandwaves, which of recent have been monopolized by media corporations that choose not to promote the alternative cultures and minority perspectives I enjoy accessing. The NAB's petition represents at attempt by these monopoly media corporations to use the FCC's regulatory powers to extend their influence to satellite radio. As I pay for the privilege of satellite radio, I disagree with NAB's move to determine this service's content. I respectfully urge the FCC to reject the NAB's petition (04-160) and to support the autonomy of satellite radio providers.

Sincerely,
Elizabeth Pisares
